

SOC Lab Investigation #003 – PowerShell Process Discovery

Alert:

PowerShell Executing Process Discovery

Severity:

Level 4

MITRE ATT&CK:

T1057 – Process Discovery

Investigation:

Wazuh detected a PowerShell command being used to view running processes on the computer. I reviewed the alert and found that the Get-Process command triggered it. The activity was logged as Event ID 4104 and was identified by Wazuh as Process Discovery.

I also checked the events around the same time to see if there was any other suspicious PowerShell activity. I did not find anything that showed malicious activity.

Conclusion:

The alert was benign. The PowerShell command was executed as part of the lab and there were no other signs of malicious activity.

Evidence:

Event ID: 4104

Rule ID: 91815

MITRE ATT&CK: T1057 – Process Discovery

Command: Get-Process | Select-Object -First 10 Name, Id

PowerShell Event ID 4104 showing the Get-Process command that triggered the alert.
